Ahmed Hossam

Backend .NET Developer (C# / ASP.NET Core)

01155011132 | ahmed21hossam08@gmail.com | linkedin/ahmedhossam | Alexandria, Egypt

SUMMARY

Backend-focused .NET developer with hands-on experience building ASP.NET Core (MVC and Web API) applications backed by SQL Server, including a digital-signature platform and a school management system used by 500+ students. Comfortable owning a feature end to end: database schema, REST API, and business logic. Strong problem-solving foundation from two ICPC/ECPC competitive programming contests.

TECHNICAL SKILLS

Languages: C#, C++, SQL, Dart

Backend: ASP.NET Core (MVC, Web API), RESTful API Design, Entity Framework

Databases: MySQL (schema design, query writing, relational data modeling)**,** SQL Server

Architecture & practices: Server-Side Logic, Layered Architecture (DAL/BLL), Clean code, Debugging, Technical Documentation, Git version control, Agile/team-based development, secure authentication (OTP, hashing), Postman

Mobile & Desktop: Flutter, WPF

PROFESSIONAL EXPERIENCE

Full-Stack Engineer — Summer Internship July 2025 – Sept 2025

SMS (School Management System) – Alexandria, Egypt

- Developed a school management system using ASP.NET Core MVC and SQL Server to digitize attendance tracking, grading, and administrative workflows for 500+ students
- Built a real-time attendance module with automated absence notifications, cutting manual paperwork across daily administrative operations
- Designed a student evaluation feature with specialization-based categorization, enabling accurate performance tracking across multiple academic tracks
- Modeled the SQL Server schema for student records, class schedules, and grade reporting to support centralized, scalable data management

Technologies: *C#, ASP.NET Core (MVC), SQL Server, REST APIs*

Full-Stack Engineer May 2025 – Sept 2025

DSG — Digital Signature Platform – Alexandria, Egypt

- Built a digital signature and document management platform in ASP.NET Core MVC and SQL Server to replace paper-based approval workflows inside organizations
- Implemented secure document signing with SHA-256 file hashing, OTP email verification, and QR-code validation to guarantee document integrity and authenticity
- Designed role-based document routing across organizations, branches, and departments, speeding up approvals and improving audit tracking
- Cut paper usage and operational overhead by digitizing multi-department signature workflows end to end

Technologies: *C#, ASP.NET Core (MVC), SQL Server, SHA-256, QR Code, Email/OTP*

CERTIFICATIONS

- ICPC Certification — Egyptian Collegiate Programming Contest (ECPC): competitive programming, teamwork, and algorithmic problem-solving under time constraints
- ICPC Certification (Online) — qualified for the regional ECPC competition through an online CPC

EDUCATION

Computer Science, Fathalla International School of Applied Technology Oct 2023 – Jun 2026

Coursework: programming fundamentals, hardware and logic circuits, operating systems, data structures and algorithms (C++), C# and the .NET framework (WPF, Web MVC, Web API), Flutter mobile development

LANGUAGES

Arabic (Native) | English (Upper-Intermediate, professional working proficiency)
